Work Experience

Morningstar India Pvt. Ltd.

Software Engineer

Feb 2024 - Present

Mumbai, India

- Work as a front-end developer on a maintenance-focused product, delivering UI fixes and feature enhancements using Vue.js, Vanilla JavaScript, and HTML/CSS.
- Migrated CI/CD pipelines from Jenkins to Harness CI in 5 sprints (3 months), scripting in Shell to automate build and deployment processes, and reduce manual overhead.
- Perform daily monitoring and debugging using Splunk and AWS CloudWatch, ensuring high system availability and rapid resolution of production issues.
- Debugged and maintained legacy front-end codebases, identifying hidden issues, resolving performance bottlenecks, and stabilizing core workflows.

Jio Platforms Ltd.

Software Engineer

July 2021 - Feb 2024

Mumbai, India

- Maintained and debugged legacy AngularJS (v1) applications, deployed updates via SAP, and resolved vulnerabilities, improving app stability and reducing load times by 15%.
- Led front-end development of a large-scale Incident Management System (IMS) using Angular v16, Angular Material, and micro-frontending, delivering Version 1.0 in just 6 months.
- Built custom search filters and a date range picker, improved data retrieval by 30% and improved overall UX across high-traffic modules.
- Performed RCA and worked with stakeholders to reduce recurring issues by 20%

Selected Projects

3d-Portfolio

3D portfolio built with React, Three.js, and Vite, featuring interactive animations and smooth UI transitions

Custom Angular Material DateRange Time Picker

A custom daterange picker using angular material, moment.js and flex-layout

Custom Search Filter Pipe

Developed a regex-based search filter for Angular tables, enabling dynamic filtering.
