Professional Summary

Front-End Engineer who treats DSA and problem-solving like a daily workout—whether it's cracking a LeetCode challenge in Java or optimizing a UI for speed. With 3+ years of experience, I build scalable, high-performance web apps using JavaScript, React, and Angular, making the web faster and smoother—one bug fix at a time.

Education

BTech in Information Technology
Graduated with a GPA of 81.04%

SRM Institute Of Science and Technology
August 2017 - May 2021

Work Experience

Morningstar India Pvt. Ltd.
Software Engineer

Feb 2024 - Present
Mumbai, India

- Work as a front-end developer on a maintenance-focused product, delivering UI fixes and feature enhancements using Vue.js, Vanilla JavaScript, and HTML/CSS.
- Migrated CI/CD pipelines from Jenkins to Harness CI in 5 sprints (3 months), scripting in Shell to automate build and deployment processes, and reduce manual overhead.
- Perform daily monitoring and debugging using Splunk and AWS CloudWatch, ensuring high system availability and rapid resolution of production issues.
- Awarded Newbie Of The Quarter for Q2 2024. 🏆 Awarded Star Of The Quarter for Q3 2024. 🏆

Jio Platforms Ltd.
Software Engineer

July 2021 - Feb 2024
Mumbai, India

- Maintained and debugged legacy AngularJS (v1) applications, deployed updates via SAP, and resolved vulnerabilities, improving app stability and reducing load times by 15%.
- Led front-end development of a large-scale Incident Management System (IMS) using Angular v16, Angular Material, and micro-frontending, delivering Version 1.0 in just 6 months.
- Built custom search filters and a date range picker, improved data retrieval by 30% and improved overall UX across high-traffic modules.
- Enabled session-based state management to retain in-progress form data and improve workflow continuity.
- Performed RCA and worked with stakeholders to reduce recurring issues by 20%

Selected Projects

Custom Angular Material DateRange Time Picker

A custom daterange picker using angular material, moment.js and flex-layout

Custom Search Filter Pipe

Developed a regex-based search filter for Angular tables, enabling dynamic filtering.

Technical Skills

Web Development

Angular, HTML5, CSS3, JavaScript, React, Vue.js

Back-End Technologies

Java, Node.js

Database Management

SQL, MySQL, MongoDB

CI/CD Tools

Jenkins, Harness CI

Cloud Platforms

Azure, AWS

Monitoring & Code Quality Tools

Splunk, SonarQube
